

National Chung Hsing University
Bachelor Program in Landscape and Recreation
Cross-Disciplinary Specialization Implementation Guidelines

- I 、 Based on the Cross-Disciplinary Specialization Implementation Regulations of National Chung Hsing University, the Bachelor Program in Landscape and Recreation (hereinafter referred to as "the Program") has established these guidelines to encourage students' self-directed learning, provide greater course flexibility and cross-disciplinary learning opportunities, and assist students in developing a second specialization. This allows students to complete a cross-disciplinary specialization without increasing (or with minimal increase to) the graduation credit requirements.
- II 、 A cross-disciplinary specialization refers to courses proposed by a department (degree program) or college of National Chung Hsing University. These courses should include fundamental core knowledge of the field, with a total credit requirement generally set at 30 credits (a minimum of 28 credits and a maximum of 32 credits). Students pursuing a cross-disciplinary specialization must fulfill both the graduation requirements of their home department (degree program) and the required credits for the specialization. Upon completion, the cross-disciplinary specialization will be noted on the student's diploma.
- III 、 Regulations for Cross-Disciplinary Specialization
- (I) Students of the Program who wish to pursue a cross-disciplinary specialization
- A 、 Must apply within the designated period, specifying the department (degree program) or college for the specialization.
- B 、 Applications must be reviewed and approved by the Program before being forwarded to the respective department (degree program) or college for final approval.
- C 、 Upon successful dual approval, students may proceed with the cross-disciplinary specialization.
- (II) Students from other departments (degree programs) who choose the Program as their cross-disciplinary specialization:
- A 、 Must apply within the designated period through their home department (degree program).
- B 、 Applications must be reviewed and approved by both the home department and the Program
- Required courses include university-required courses (28 credits), foundational required courses of the home department, professional electives or other recognized courses, and the mandatory courses for the cross-disciplinary specialization in the Program.- Upon completion, the specialization will be recorded on the student's diploma.

- IV 、 The Program will designate a full-time faculty member as a cross-disciplinary specialization advisor, who will collaborate with advisors from other departments (degree programs) or colleges to guide students in the specialization.
- V 、 Matters not covered in these guidelines shall be handled in accordance with the university's academic regulations and other relevant policies.
- VI 、 These guidelines take effect upon approval by the University Curriculum Committee. Any amendments shall follow the same procedure.

**The Mandatory Course List for Cross-Disciplinary Specialization in the
Bachelor Program in Landscape and Recreation at National
Chung Hsing University (A)**

(Applicable to students admitted from the 2019 academic year onwards)
