department. Please refer to the announcements from the

Academic Affairs Division, Curriculum Section.

IX. Double major :

- (I) Students pursuing a double major must meet the graduation requirements based on the academic year in which their double major was approved. In addition to completing all required credits for their primary department (institute or degree program), double major students must also complete all professional required course credits of the additional major department (institute or degree program) to qualify for a double major.
- (II) If, after deducting the credits required by their primary department (degree program), an undergraduate student's additional major's professional required course credits still do not reach 40 credits, or if the professional required course credits of the additional major were originally less than 40 credits, the student must fulfill the shortfall with designated elective course credits specified by the additional major department (degree program).

X. Cross-domain expertise :

This department offers courses for undergraduate students. If there is an overlap between cross-disciplinary specialization courses and the required courses or credits of a student's primary department (degree program), double major, minor, or other cross-disciplinary specialization, the shortfall must be fulfilled with relevant elective courses designated by the cross-disciplinary specialization department (degree program) or college.

- XI. **Admission Requirements:** Graduates from foreign equivalent schools with a shorter duration of study than domestic senior high schools and junior colleges, such as graduates from an overseas Form 5 education system, must complete at least an additional 12 credits. The required additional credits and courses are detailed in the attached table.

※ The required courses and graduation credit requirements shall be specified by each department according to the curriculum plan.

※ If there are no changes to courses or credits, submission is not required every academic year.
